On an auspicious day in September 2012

Invitation to 2012 Japan Die Casting Congress & Exposition

Dear Valued Customers,

Thank you for your continued support over the years.

Toshiba Machine is pleased to announce our participation at the 2012 Japan Die Casting Congress & Exposition, which will be held at Pacifico Yokohama from Thursday, November 8 through Saturday, November 10, 2012.

Under the concept of "Next generation standards begin from here," Toshiba Machine will exhibit and introduce DC350EH, a hybrid die casting machine developed with a focus on high quality, high productivity and high environmental performance, as well as DC350J-SXT, a die casting machine manufactured at our third production base (Thailand) with a focus on stable production, user friendliness and low cost.

We will also be delivering the research papers listed below at the die casting congress to be held in conjunction with the exposition.

We look forward to welcoming you at the congress & exposition venues.
