An Outline of the Company

TOSHIBA MACHINE, an integrated machine builder with longstanding international renown for its total capability and quality, excels in the production of machine tools, plastic processing machinery, industrial machinery, hydraulic equipment, semiconductor manufacturing equipment, precision machinery, and electronic controls.

TOSHIBA MACHINE was one of the first companies to establish mechatronics-oriented production systems by utilizing its own advanced precision technologies and sophisticated electronics experience for the research and development of the advanced technologies required for the future and for continuous and stable growth.
